

SEA Lab Summer Day Camp

Ages: 9-12

9:00am-3:00pm

Explore the ocean through games, crafts and exciting outdoor activities!

*Live Ocean Animals

*Hands-On Activities

*Kayaking

*Experienced & Friendly Staff

*Fun Beach Activities

Session	Camp Dates	Theme
1	July 14-July 18	Creature Features
2	July 21-July 25	Ocean Explorers
3	July 28-August 1	Creature Features
4	August 4-August 8	Ocean Explorers

Creature Features: How does an octopus change color? What does a lobster and a violin have in common? The answers to these questions and many more will be answered while exploring the fascinating adaptations of our local ocean critters. Highlights include guided tidepooling and kayaking in our local harbor.

Ocean Explorers: Get ready to get muddy and wet! There are animals living in smelly mud and hiding under rocks and we are going to find them! Our activities will explore local marine habitats both on-site and in the field. Highlights include investigating wetlands using scientific tools and a kayak exploration of our local harbor.
